

The Centec Group

Centec is a privately owned group of companies. Our automated process skids are used throughout the entire brewing process. For soft drinks, dairy and food industries we offer a large variety of skid mounted systems. We have decades of experience in water purification and deaeration, carbonation, liquid blending and dosing, flash pasteurization and cleaning-in-place. Centec technology includes a range of high precision process sensors for accurately measuring critical product properties such as extract, alcohol, milk fat, O₂ and CO₂. The largest brewery, soft drink, dairy and food groups in the world are among our key customers.

Accuracy. Reliability. Centec.

CIP & SIP

Cleaning-in-Place & Sterilization-in-Place

Centec Beverage Systems

Automated
process skids
and high precision
sensors from a
single source.
Centec.

CIP & SIP

The Principle

CIP and SIP units are applied for fully automatic cleaning and disinfection of valves, pumps, tanks, piping systems and filling machines. Where most stringent hygienic standards apply, sterilization-in-place (SIP) with chemicals or steam takes place after cleaning-in-place (CIP). Cleaning and sterilisation regimes are always adapted to each client's very specific requirements. Some parts of the plant may be cleaned only with water, while other parts might require detergents, acids and caustic solutions. Detergents can be rejected after use ("total loss CIP") or recovered and stored for re-use ("batch CIP"). Centec provides a large variety of CIP and SIP systems. They can be small and mobile or large and stationary – including storage vessels for water and detergents. No matter how complex the requirements may be, Centec has the appropriate solution and extensive expertise in this field. All CIP and SIP systems are designed in such a way that optimal cleaning and disinfection is ensured, with the lowest consumption of detergents, water and energy. Based on highly accurate conductivity and temperature sensors and reliable flow meters, Centec CIP and SIP units stand for efficient and consistently thorough results.

Technical Data

Capacity	according to requirements
Cleaning Media	acid, caustic, additives, steam
Pressure of Operation	0 - 7 bar
Temperature of Operation	2 - 85 °C (liquid) up to 165 °C (steam)
Material	1.4301/1.4404 AISI 304/316L
PLC	SIMATIC S7
Options	detergent and water storage

The Centec production is certified according to ISO 9001.

- **Application Specific and Energy Efficient**
cleaning concept perfectly adapted to requirements
optimal cleaning at lowest consumption of resources
storage vessels for detergents and water on demand
- **Modular Design with Standard PLC**
skid mounted for easy installation and start-up
- **Hygienic Execution Based on Proven CIP Concepts**
- **Outstanding Price-Performance-Ratio**

Experience. Expertise. Centec.
