

## Product Highlights

### Cleaning-in-Place

Centec designs and builds CIP units to deliver efficient cleaning across a wide variety of process systems – starting with small mobile sets typically for cleaning individual items through to multi-tank systems for large plants.

### Reverse Osmosis

With reverse osmosis, all ions, viruses, bacteria and solids remain in the retentate. For sterilization and WFI, we provide pure steam generators and various evaporation technologies, e. g. multistage pressure columns.

Our Additive Dosing System is used for the production of cosmetics, personal care and chemical products. Various fluids from low viscosity solvents through to high viscosity polymers can be continuously and accurately blended or dosed into a main stream.

## Innovation for the Laboratory

### Laboratory Density Meter

For extremely accurate determination of density and temperature in the lab. Sample volume 2 ml. Equipped with a user friendly 10" touch screen.

## Global Knowledge for Local Applications

### Germany

Centec Gesellschaft für Labor- und Prozessmesstechnik mbH  
Wilhelm-Röntgen-Strasse 10  
63477 Maintal  
Tel.: +49 6181 18 78 0  
Fax: +49 6181 18 78 50

## Energy Systems & Sensors

The Efficacy of Technology

## The Centec Group

Centec is a strong, privately owned group of companies. From conventional power plants to solar energy and biofuel – there is a broad range of applications for our tailor-made process units. We are a leading supplier of water purification and water deaeration technologies in various areas. Our inline and mobile devices for oxygen measurement set standards with respect to design and accuracy. The largest energy groups in the world are among our key customers. We are a supplier of numerous coal fired and nuclear power plants.

Our production facilities in Germany and the Czech Republic include a skilled electrical and automation department with in-house switch cabinet manufacturing. As a core element of our growth strategy, we are currently expanding our Czech operations.

This outstanding infrastructure allows efficient logistics, short lead times and strict adherence to delivery deadlines. The quality of our products is outstanding, so is the price-performance ratio.

## Sensor Innovations

### External Display

Aiming for increased user-friendliness, the external display is the perfect solution for installations that are difficult to access. Available for OXYTRANS, RHOTEC and SONATEC.

### Retractable Unit for O<sub>2</sub> Sensor

For continuous measurement of the O<sub>2</sub> content in liquids and gases. The sensor can easily be drawn back without stopping the system, e. g. during sterilization of the plant. Manual and pneumatic version.

**Innovation. Dedication. Centec.**

## Automated Process Skids

The broad range of our process units includes automated process skids designed to customer requirements for various applications in dairies:

- Iron Removal
- Manganese Removal
- Water Softening
- Ion Exchange
- Reverse Osmosis
- Membrane Water Deaeration
- Column Water Deaeration
- Vacuum Water Deaeration
- Additive Dosing
- Cleaning-in-Place (CIP)
- Sterilization-in-Place (SIP)

No matter how complex requirements may be, Centec will provide the right solution. Our capabilities include the planning, delivery, assembly and commissioning of turn-key plants. We are pleased to offer on-site training for your staff. Our after sales service is an example and highly valued by our customers. Assistance is available anytime by telephone or online. Qualified service technicians for on-site support can be requested at short notice.

**Experience. Expertise. Centec.**

## High Precision Sensors

Centec sensors are applied in laboratory and process environments. They ensure that products are produced to consistently high standards and that processes run extremely efficiently with the least consumption of energy and raw materials. Our portfolio covers the following measurements:

- OXYTRANS – O<sub>2</sub> in liquids and gases
- RHOTEC – density of liquids
- SONATEC – sound velocity in liquids
- COMBITEC – functionality of SONATEC and RHOTEC combined

The measurement of density or sound velocity allows the concentration of a media such as acid or caustic to be displayed. In three component liquids both density and sound velocity need to be measured.

**Accuracy. Reliability. Centec.**
