

Product Highlights

Cleaning-in-Place

Centec designs and builds CIP units to deliver efficient cleaning across a wide variety of process systems – starting with small mobile sets typically for cleaning individual items through to multi-tank systems for large plants.

Flash Pasteurizer

Designed to pasteurize milk and other dairy products. The fully automated process skid uses high precision sensors and the most accurate control technology. Together with appropriate heat exchangers it delivers the right level of heat input, energy recovery and cooling.

Innovation for the Laboratory

Laboratory Density Meter

For extremely accurate determination of density and temperature in the lab. Sample volume 2 ml. Equipped with a user friendly 10" touch screen.

Global Knowledge for Local Applications

Winery Systems & Sensors

The Taste of Technology

Dairy · Food · Brewery · Beverage · Pharmaceutical · Chemical · Semiconductor · Energy · Power Plants

Dairy · Food · Brewery · Beverage · Pharmaceutical · Chemical · Semiconductor · Energy · Power Plants

The Centec Group

Centec is a strong, privately owned group of companies. We design and manufacture automated process skids for efficient and reliable production of wine and spirit drinks. Centec technology includes a range of process sensors for accurately measuring and controlling crucial product characteristics. We are a supplier of numerous wineries and distilleries across the world.

Our production facilities in Germany and the Czech Republic include a skilled electrical and automation department with in-house switch cabinet manufacturing. As a core element of our growth strategy, we are currently expanding our Czech operations.

This outstanding infrastructure allows efficient logistics, short lead times and strict adherence to delivery deadlines. The quality of our products is outstanding, so is the price-performance ratio.

Sensor Innovations

External Display

Aiming for increased user-friendliness, the external display is the perfect solution for installations that are difficult to access. Available for OXYTRANS, RHOTEC and SONATEC. With two 4 mA - 20 mA outputs. Cable length between sensor head and display up to 10 meters.

Retractable Unit for O₂ Sensor

For continuous measurement of the O₂ content in liquids and gases. The sensor can easily be drawn back without stopping the system, e. g. during sterilization of the plant. Manual and pneumatic version.

Innovation. Dedication. Centec.

Automated Process Skids

The broad range of our process units includes automated process skids designed to customer requirements for various applications in wineries:

- Iron & Manganese Removal
- Activated Carbon Filtration
- Water Softening & Ion Exchange
- Activated Carbon Filtration
- Reverse Osmosis
- UV Desinfection
- Ultra Filtration
- Membrane Water Deaeration
- Column Water Deaeration
- Vacuum Water Deaeration
- Carbonation
- Grape Wort Aeration
- Multi-Component Mixing
- Additive & SO₂ Dosing
- Flash Pasteurization
- Dealcoholization
- Cleaning-in-Place (CIP)
- Sterilization-in-Place (SIP)

No matter how complex requirements may be, Centec will provide the right solution. Our capabilities include the planning, delivery, assembly and commissioning of turn-key plants.

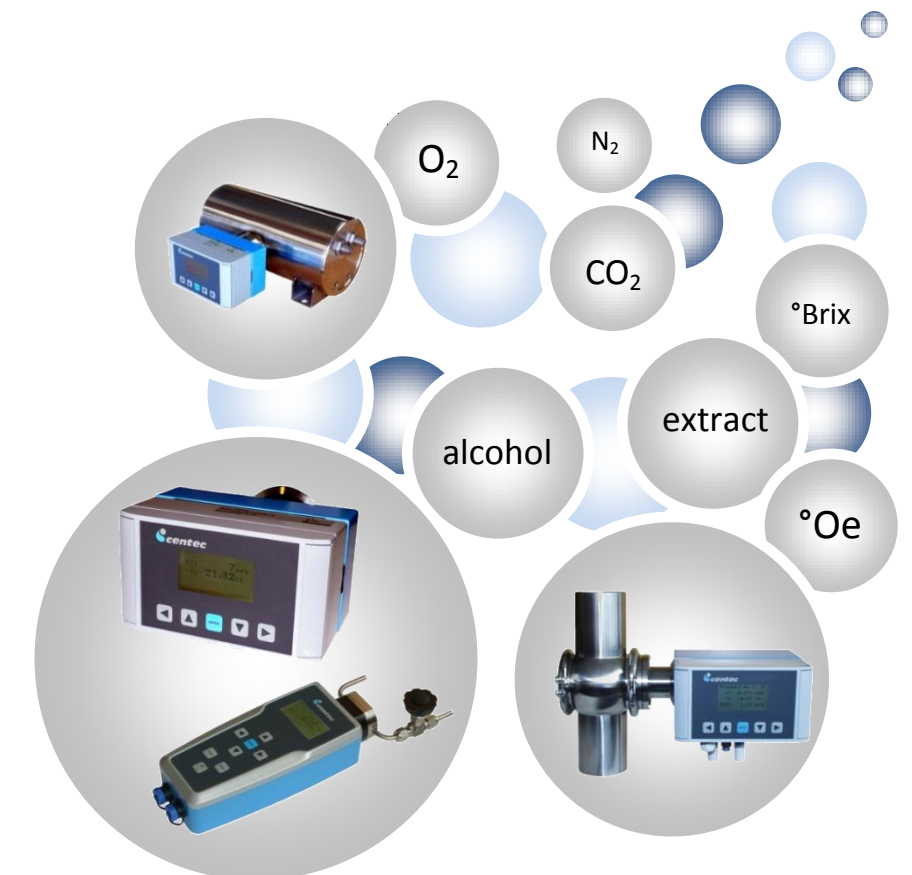

Experience. Expertise. Centec.

High Precision Sensors

Centec sensors are applied in laboratory and process environments. They ensure that products are produced to consistently high standards and that processes run extremely efficiently with the least consumption of energy and raw materials. Our portfolio covers the following measurements:

- OXYTRANS – O₂ in liquids and gases
- CARBOTEC – dissolved CO₂ in liquids
- RHOTEC – density of liquids
- SONATEC – sound velocity in liquids
- COMBITEC – functionality of SONATEC and RHOTEC combined

The measurement of density or sound velocity allows the concentration of a media such as sugar, alcohol or extract to be displayed. In three component liquids both density and sound velocity need to be measured.

Accuracy. Reliability. Centec.
